

Professional first aid backpack h687_21

First aid backpack equipped with two handles and internal divider. Dimensions: 360 x 520 x 300 ± 10 mm. Capacity: 30 kg.

The first aid backpack is an essential product for carrying out rescue operations effectively, thanks to the possibility of transporting medical instruments necessary for first aid.

The professional backpack is characterized by **extreme versatility** thanks to the arrangement of the internal parts and the **dual transport mode**.

The backpack is equipped with two handles, an external pocket with zip closure at the bottom, 1 front pocket with side access, 2 external pockets with zip closure, 3 transparent pockets with zip closure located on the internal side in the main compartment of the backpack and 2 transparent pockets with zip closure on the internal side of the front flap.

The internal divider is equipped with two large pockets with zip closure, one of which is transparent, while the backrest is reinforced with aluminum profiles.

Padded and height-adjustable shoulder straps, with chest and abdominal belt with quick-release buckle for better weight distribution on the operator. Backrest with padding in the areas of greatest support covered with breathable fabric. Reflective inserts to increase visibility.
