

Professional gas tossing pan h1051_05

h1051_05 gas tossing pan in 304 STAINLESS STEEL (Ø 100 cm). 14 kW burner and tilting frame with chains. Ideal for catering and spectacular show cooking.

The **h1051_05 professional gas tossing pan** is equipment designed for catering professionals, great chefs, and catering companies. It addresses the need to prepare high quantities of food while simultaneously ensuring a strong visual impact during important events and show cooking sessions. Equipped with an impressive 100 cm pan in 304 stainless steel, this tilting structure is mounted on a specific frame with oscillating chains and a long handle. This mechanical configuration allows for easy movement of the product, tossing pasta, risottos, paella, and sauces with a simple continuous movement. The integrated cooker uses a powerful 14 kW FGC series gas burner, capable of evenly heating the entire bowl while operating in total safety thanks to the piezoelectric ignition and the accidental flame-out protection system.

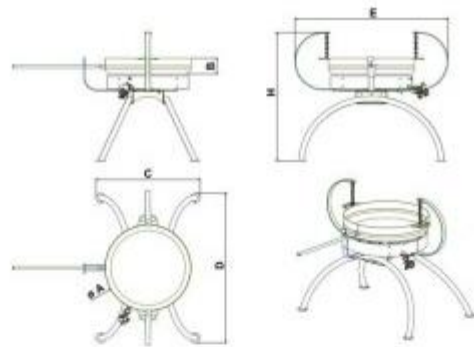

Technical specifications

- **Type:** Gas tossing pan / Tilting pan with integrated burner
- **Bowl and burner material:** 304 STAINLESS STEEL
- **Thermal power (P):** 14 kW
- **Pan diameter (Ø A):** 1000 mm
- **Pan height (B):** 150 mm
- **Total structure height (H):** 1200 mm
- **Maximum overall width (E):** 1630 mm
- **Support base dimensions (C x D):** 970 x 1390 mm
- **Heating system:** Large FGC series STAINLESS STEEL gas burner
- **Ignition and control:** Piezoelectric with pilot flame
- **Safety:** Integrated device against accidental flame-out
- **Movement system:** Specific support frame with oscillating chains and long handle
