

## Professional heated display case h110\_159

Professional heated display case h110\_159 for buffets, with an elegant bamboo structure and tempered glass surface. Power 450W, adjustable thermostat up to 90°C and acrylic lid. Dimensions: 85x50.5x32.2 cm.

The **h110\_159 heated buffet display case** is a high-level exhibition module, designed to maintain hot dishes at the ideal temperature during service in hotels, B&Bs, and catering. The structure stands out for the material combination of **black epoxy powder-coated steel** and refined **bamboo walls**, offering a natural and modern design. The worktop consists of a 53 x 32.5 cm **tempered glass heating surface**, controlled by an adjustable thermostat that allows reaching 90°C. Thermal and hygienic protection is guaranteed by a solid transparent acrylic lid with a hinged opening.

## Technical features

- **Base material:** steel coated with black epoxy powders.
- **Side design:** decorative bamboo panels.
- **Heating surface:** tempered glass (useful area: 53 x 32.5 cm).
- **Temperature control:** adjustable thermostat up to **90°C** with light indicator.
