

Professional safety harness for work at height h1046_14

Professional safety harness h1046_14 black for work at height and rescue. Modular with removable upper part. Tested to 130 kg.

The **professional safety harness for work at height h1046_14** is a personal protective equipment developed specifically for **operators and rescuers** who require maximum efficiency and reliability at height. This device meets the technical needs of professionals operating in industrial, rescue, and entertainment contexts, solving the operational problem of **combining ultra-rapid donning with the need to modularize the equipment according to the maneuver, reducing thermal fatigue thanks to lightweight and highly breathable components**. The model stands out for a removable upper part, comfortable and lightweight, which can be managed separately according to intervention needs. A distinctive feature of this version is the black coloring, particularly appreciated for all uses where the equipment must be low-visibility, such as in military applications, theater and cinema, or during acrobatic shows. Entirely produced in Italy, the harness guarantees high quality standards and is tested to support a load of 130 kg, respecting physical and dimensional requirements.

Technical features

- **Model:** h1046_14
- **Intended use:** professional for operators and rescuers
- **Structural configuration:** removable upper part (chest), comfortable, lightweight, and breathable
- **Donning mode:** designed for ultra-rapid donning
- **Overall mechanical resistance:** tested to 130 kg
- **Color finish:** black coloring (suitable for low-visibility environments)
- **Manufacturing and origin:** quality product completely made in Italy
- **Specifications by size and anthropometric parameters:**
 - **Size S:** standard EN 12277/C, EN 361, EN 12277/A, EN 813; weight 1100 g; waist measurement 60/95 cm; leg loop measurement 40/60 cm; chest measurement 75/85 cm; note: Black
 - **Size M/L:** standard EN 12277/C, EN 361, EN 12277/A, EN 813; weight 1150 g; waist measurement 75/110 cm; leg loop measurement 50/70 cm; chest measurement 86/110 cm; note: Black
 - **Size XL:** standard EN 12277/C, EN 361, EN 12277/A, EN 813; weight 1200 g; waist measurement 85/130 cm; leg loop measurement 65/78 cm; chest measurement 90/118 cm; note: Black
