

Professional shoe dryer h1034_03

Professional wall-mounted shoe dryer for 15 pairs, in stainless steel. Dimensions: W 86 x D 48 x H 200 cm.

The **H1034_03** model is a **professional wall-mounted shoe dryer**, designed for high-intensity environments such as **mountain hotels, alpine huts, ski centers, barracks and fire brigade operational headquarters**.

Thanks to its **capacity of 15 pairs of shoes**, it represents the ideal choice for facilities wishing to offer their guests or operators footwear that is **perfectly dry, sanitized and preheated**.

The panel is **made entirely of stainless steel**, a material that guarantees **resistance, hygiene and long life**, even in humid environments or those subject to thermal changes.

Operation is based on a **hot water** system with **1/2" connections** that connects to the heating system via a technical hydraulic intervention. The system works optimally at a **constant temperature between 35°C and 40°C**, without the use of electricity, thus resulting in an **eco-friendly and low energy impact** solution.

The **rounded brackets**, continuously bent, ensure a **fluid and constant circulation of hot water**. This eliminates pressure points and prevents cooling of the brackets, ensuring **effective and uniform** drying, right down to the tip of the footwear. The shape of the brackets is designed to prevent any lateral or downward tilting, keeping the shoes always in a stable position.

The H1034_03 model is also suitable for **children's shoes and gloves**, making it **versatile and complete** for every type of user. It requires no maintenance and comes with a **5-year warranty**, a guarantee of quality and reliability over time.

Don't miss the opportunity to equip your facility with a high-performance professional shoe dryer! Contact us now to receive a personalized quote on the **H1034_03 model** and discover the offers reserved for multiple supplies.

Technical characteristics:

- **Structure:** entirely in stainless steel
- **Capacity:** 15 pairs of shoes
- **Usage:** adult and children's shoes, and gloves
- **Dimensions:** W 86 x D 48 x H 200 cm
- **Power supply:** connection to hot water system (requires hydraulic intervention)
- **Connections:** standard 1/2"
- **Recommended flow temperature:** 35–40°C
- **Mounting:** wall-mounted
- **Maintenance:** not required
- **Warranty:** 5 years
- **System:** continuous rounded brackets for uniform water circulation

User benefits:

- **Drying:** deep and effective even in extreme conditions.
- **Structure:** solid and hygienic, ideal for intensive use.
- **System:** ecological without electricity consumption.
- **Compatible:** with children's shoes and gloves.
- **None:** maintenance required, saving time and costs.

FAQ:

1. **Does the system only work with hot water?**

Yes, the panel requires connection to the hot water heating system by a hydraulic technician with a temperature between 35 and 40°C.

2. **What are the advantages compared to an electric shoe dryer?**

This system is ecological, safer (no electricity), more economical in the long run and completely maintenance-free.

3. **Can it also be used in non-hotel contexts?**

Yes, it is also perfect for barracks, operational headquarters, mountain huts, sports centers and any environment subject to humid or cold conditions.

4. **Is it difficult to install?**

No, it is easily installed on the wall with standard 1/2" connections, compatible with common plumbing systems.

5. **Does the product have certifications or a warranty?**

The product is guaranteed for 5 years and built with certified materials for professional use in critical environments.

Mini buying guide:

When choosing a shoe dryer for a hospitality or operational facility, it is essential to evaluate the **capacity** based on the average number of users. Models like the H1034_03, with **15 stations**, are ideal for high-flow facilities. Furthermore, a **hot water** system represents a sustainable, efficient and maintenance-free choice. Preferring a **stainless steel** product ensures greater durability, hygiene and resistance to atmospheric agents and humidity. Finally, always check the **compatibility with gloves and small footwear**, for complete flexibility of use.
