

Professional stainless steel bin h20_128

Static 110 lt bin in AISI 430 stainless steel with pedal opening, HACCP compliant, removable front for bag replacement.

Static bin designed for professional waste management in environments requiring hygiene and regulatory compliance. The **AISI 430 stainless steel** structure with a bright finish ensures durability and ease of cleaning, essential features in professional kitchens, canteens, healthcare facilities, and public places.

Pedal operation allows the lid to open without manual contact, reducing the risk of contamination and contact with dirty surfaces. The **removable front** significantly simplifies bag replacement and emptying operations, while the integrated **bag-holding elastic** keeps the bag in place during use.

Tubular supports with four points of contact guarantee stability and easy movement on flat floors.
