

Professional stainless steel trolley h956_05

Professional AISI 304 stainless steel trolley with three lipped shelves, 80x50x96 cm. Hygienic structure on wheels with brake for the HoReCa sector.

The **h956_05** professional trolley represents an advanced logistical solution for handling loads in environments requiring rigorous hygiene standards, such as industrial kitchens, canteens, hospitals, and laboratories. Entirely made of **AISI 304 stainless steel**, it guarantees total resistance to corrosion and easy sanitization, meeting the operational needs of the HoReCa and healthcare sectors.

The structure is characterized by a round tube frame that balances lightness and structural solidity. The three shelves are equipped with a 40 mm **peripheral containment edge**, designed to prevent the accidental fall of objects during transport, ensuring maximum stability even on irregular floors. The ergonomic handle and high-sliding wheels allow for smooth maneuverability even when fully loaded.

Technical features

- **Material:** AISI 304 stainless steel for food and medical use
- **Configuration:** 3 smooth shelves with 40 mm peripheral edge
- **Dimensions:** W 50 x D 80 x H 96 cm
- **Structure:** High-resistance stainless steel round tube
- **Handling system:** 4 non-marking swivel wheels Ø 125 mm
- **Safety:** 2 wheels equipped with pedal brake and stainless steel supports
- **Ergonomics:** Towing handle integrated into the frame
