

Professional telescopic ladder h853_11

Professional aluminium telescopic ladder with 10+10 rungs, foldable stabilizers, integrated levelers and compliance with EN 131 standard.

This **professional telescopic ladder** is designed to ensure maximum versatility and safety during high-altitude operations requiring intensive use. Made with a sturdy **aluminium** structure, it stands out for its molded aluminium leaf hinge that ensures structural solidity even at maximum extensions. The telescopic system allows the height of the ladder to be adapted to the specific needs of the construction site or maintenance environment, offering a multi-purpose solution for professionals and installers.

Technical features

- **Material:** high-strength aluminium
- **Configuration:** two telescopic legs with quick release
- **Stability system:** two foldable base stabilizers to reduce dimensions
- **Leveling:** equipped with two levelers to operate on irregular surfaces
- **Mobility:** two integrated non-marking wheels to facilitate transport
- **Included accessories:** practical tool bag for the operator
- **Capacity:** 10+10 rungs
- **Compliance:** ladder compliant with European standard EN 131
