

Professional telescopic ladder h858_17

Professional 4.1-meter telescopic ladder in anodized aluminum, 14 non-slip steps, EN 131 certified, extremely compact and portable.

This **professional telescopic ladder** represents the ideal solution for operators who require equipment for work at height capable of combining a significant operating height with minimal footprint during storage. Thanks to the **anodized aluminum** structure, the tool guarantees high resistance to oxidation and keeps contact surfaces clean, making it also suitable for indoor environments or representative contexts. The telescopic extraction system solves the problem of transport in small vehicles, ensuring maximum operational versatility for rapid maintenance interventions and technical inspections.

Technical features

- **Material:** high-strength anodized aluminum
- **Safety:** special steps with non-slip surface
- **Number of steps:** 14
- **Load capacity:** maximum weight 150 kg
- **Dimensions when closed:** 93 x 47 x 9 cm
- **Maximum height:** 4.1 meters
- **Regulatory compliance:** produced according to EN 131 safety standards
