

Professional telescopic ladder h858_20

Professional telescopic ladder in anodized aluminum, height 380 cm. Compact structure with 13 non-slip rungs, compliant with EN 131 standards.

This **professional telescopic ladder** is designed for operators who require versatile equipment for working at height, solving space issues during transport and storage. Made of **anodized aluminum**, the structure prevents oxidation and ensures clean handling, making it ideal for interventions in indoor environments and offices. The telescopic system allows the height to be adjusted up to 380 cm, offering constant stability thanks to rungs with non-slip surface treatment.

Technical specifications

- **Material:** anodized aluminum
- **Rung configuration:** 13 rungs with ribbed non-slip surface
- **Maximum load capacity:** 150 kg
- **Maximum extended height:** 380 cm
- **Closed dimensions:** 86 x 47 x 9 cm
- **Certifications:** Product compliant with EN 131 safety standards
- **Portability:** Ultra-compact design for easy manual handling
