

Professional telescopic ladder h858_52

Professional 4x4 anodized aluminum telescopic ladder. Max height 460 cm, capacity 150 kg. Compact and EN 131 certified for intensive use.

This **professional telescopic ladder** represents a versatile solution for maintenance, installation, and logistics operations. Designed to solve the challenges associated with the transport of bulky equipment, the **anodized aluminum** structure guarantees high mechanical resistance and durable protection against oxidation. The modular extension system allows the height to be adapted to the specific needs of the construction site or operating environment, always ensuring maximum stability thanks to the integrated **locking mechanism**.

Technical characteristics

- **Material:** High-quality anodized aluminum
- **Step configuration:** 4 x 4 with non-slip ribbed surface
- **Maximum extended height:** 460 cm
- **Height in stepladder position (self-supporting):** 220 cm
- **Closed dimensions:** W. 79 x D. 26 x H. 120 cm
- **Maximum capacity:** 150 kg
- **Safety:** Compliant with EN 131 standards
- **Locking system:** Safety mechanism for segment fixing
