

Professional telescopic ladder h858_57

320 cm anodized aluminum telescopic ladder. 150 kg capacity, 11 non-slip rungs and soft-close system for maximum safety. The **telescopic ladder** is a professional tool designed to combine sturdiness and practicality in maintenance, installation, and logistics contexts. Made of **anodized aluminum**, the structure guarantees optimal resistance to corrosion and high operational stability, supporting a maximum load of **150 kg**. The innovative design integrates a soft-close system operated by two buttons, designed to prevent accidental crushing and facilitate repositioning after use.

Technical specifications

- **Material:** high-quality anodized aluminum
- **Maximum capacity:** 150 kg
- **Rungs:** 11 rungs with non-slip surface
- **Maximum extended height:** 320 cm
- **Closed dimensions:** 85 x 46 x 8 cm
- **Closing mechanism:** assisted with two-button system
