

Professional telescopic ladder h858_64

Professional telescopic ladder in anodized aluminum, height 260 cm and capacity 150 kg. Modular opening system and minimum overall dimensions when closed.

This **professional telescopic ladder** is designed to offer a versatile and safe solution in operational contexts that require frequent movements or interventions in limited spaces. Made of **anodized aluminum**, the structure guarantees optimal maneuverability without sacrificing mechanical robustness. The "step-by-step" opening and closing system represents the technological heart of the product, allowing the operator to adjust the height precisely, extending only the number of rungs necessary for the specific activity.

Technical characteristics

- **Material:** high-resistance anodized aluminum
- **Maximum capacity:** 150 kg
- **Number of rungs:** 9 rungs with ribbed anti-slip surface
- **Maximum extended height:** 260 cm
- **Dimensions in closed configuration:** 75 x 46 x 9 cm
- **Safety system:** automatic locking of individual segments
