

Professional telescopic ladder h858_66

3.20 meter professional telescopic ladder in anodized aluminum. Compact design and non-slip steps, ideal for frequent transport.

This **professional telescopic ladder** represents the ideal solution for operators who need a versatile and easily transportable height access tool. Made of **anodized aluminum**, the structure not only guarantees high resistance to oxidation and atmospheric agents, but also prevents the blackening of hands typical of raw aluminum. The cutting-edge telescopic system allows the ladder to be extended exactly to the desired working height, optimizing safety and stability in every operational context.

Technical features

- **Material:** High-quality anodized aluminum
- **Number of steps:** 11 steps with a special non-slip surface
- **Maximum capacity:** 150 kg (compliant with professional standards)
- **Maximum extended height:** 320 cm
- **Dimensions in closed configuration:** 79 x 46 x 7 cm
- **Locking mechanism:** Controlled opening system for maximum compactness
