

Professional use ladder h858_54

Multi-purpose ladder in anodized aluminum with 4x5 non-slip steps. Maximum height 570 cm, 150 kg capacity and EN 131 compliance for professional use.

This **professional multi-purpose ladder** is designed to offer maximum versatility in operational contexts requiring variable configurations. Made of **anodized aluminum**, the structure ensures high corrosion resistance and superior cleanliness during handling, avoiding the blackening of hands typical of raw aluminum. The hinge system allows the equipment to be adapted to different heights and positions, solving access problems in construction sites, warehouses, or complex maintenance interventions.

Technical features

- **Material:** high-quality anodized aluminum
- **Step configuration:** 4 elements of 5 steps each (4 x 5)
- **Safety:** special non-slip steps with ribbed surface
- **Locking mechanism:** integrated safety system for position fixing
- **Maximum capacity:** 150 kg
- **Maximum extended height:** 570 cm
- **Height in scissor configuration:** 273 cm
- **Storage dimensions (closed):** W. 79 x D. 26 x H. 146 cm
- **Compliance:** manufactured according to European safety standards EN 131
