

Professional veterinary table h938_17

Professional stainless steel veterinary table with water-resistant phenolic top, detachable and with feet. Dimensions: W 140 x D 70 x H 85 cm.

The **professional stainless steel veterinary table h938_17** is designed to offer maximum performance in hospital environments and veterinary clinics. Its **stainless steel construction** guarantees long-term durability and effective protection against corrosion, ensuring hygiene and safety even in high-humidity environments or where frequent cleaning is required. The **water-resistant phenolic material** worktop is ideal for preventing damage from liquids and ensures an easy-to-clean surface, always maintaining the hygiene standards required in the medical field.

The table is completely **detachable**, making it versatile and practical to transport or store in limited spaces. The **adjustable feet** allow for precise adaptation on any type of flooring, ensuring stability and safety during clinical operations. Thanks to the optimized dimensions, it offers ample workspace for examining and treating animals, without taking up too much space in the room.

This table is ideal for those seeking a robust, practical, and durable solution for daily activities within veterinary clinics and hospitals, maintaining a high quality of service.

Renew your clinic with the **professional stainless steel veterinary table h938_17**, designed to last over time and to offer ease of cleaning and transport.

User benefits:

- Water-resistant and easy to clean.
- Simple assembly and disassembly, ideal for frequent moves.
- High-quality materials ensure long durability.
- Adjustable feet for maximum safety and stability.

FAQ:

1. **Is the table suitable for intensive clinic use?**
Yes, the stainless steel construction and the phenolic top make it resistant to intensive daily use.
2. **Is it easy to transport?**
Yes, the table is detachable, which facilitates transport and storage.
3. **Are the feet adjustable?**
Yes, the feet are adjustable to ensure stability on any type of flooring.
4. **Does the table resist liquids?**
Yes, the phenolic top is designed to resist liquids and chemicals, making the table easy to clean.

Mini buying guide:

When choosing a **professional veterinary table h938_17**, always consider the materials it is built with. **Stainless steel** is ideal for guaranteeing corrosion resistance and long life, while a **water-resistant phenolic top** is fundamental for facilitating cleaning and preventing damage.

A **detachable** table offers great flexibility, especially for those working in environments with limited space or who need to move equipment frequently. Finally, make sure the table has **adjustable feet** to be able to use it on uneven surfaces without compromising stability.
