

Projection screen for conference rooms h920_02

Robust motorized screen, easy to install. Maximum dimensions: 3,070x2,157 mm. Projection area: 2,900 mm.

The **motorized event screen** is ideal for **professional installations** in environments such as conference rooms, auditoriums, and high-end home theaters. Designed to ensure **durability and ease of use**, it features **iron laminate end caps and bottom bar terminals** that give the product a solid and resistant structure. The **aluminum housing** is equipped with an **innovative interlocking system**, designed to minimize the transmission of vibrations from the motor, thus reducing noise and increasing user comfort.

The **mounting system** is versatile and symmetrical, allowing for practical installation. The screen comes with a **TTGO motor** equipped with an **integrated RF receiver and remote control**, for easy remote operation.

Technical characteristics:

- **Maximum overall dimensions:** 3,070 x 2,157 mm
- **Projection area:** 2,900 mm
- **Assembly type:** Rear drop
- **Fabric material:** Vision White with 5 cm border
- **Fabric finish:** Matt White
- **Control position:** Right
- **Voltage:** 230V 50Hz
- **Screen control:** TTGO motor with integrated RF receiver and remote control

User benefits:

- **Simple and versatile installation** thanks to the symmetrical system.
- **Quiet operation during use** for a distraction-free experience.
- **Sturdiness and durability** guaranteed by high-quality materials.
- **Intuitive remote control** via remote.

FAQ:

- **How is the screen installed?** The Rugby Pro screen can be installed with rear drop thanks to the symmetrical mounting system.
- **Is the motor noisy?** No, the housing's interlocking system minimizes vibrations, limiting noise.
- **What is the fabric finish?** The finish is Matt White, with a 5 cm border.

Mini buying guide: Consider the **h920_02 motorized screen** if you are looking for a product that combines resistance, ease of installation, and quiet operation. Ideal for professional projections, it is compatible with meeting rooms, educational spaces, and home entertainment environments.

When choosing a motorized screen for professional installations, it is important to consider some key aspects. Ensure that the screen dimensions are suitable for the room and viewing distance. The model **Rugby Pro** has a projection area of **2,900 mm** and maximum overall dimensions of **3,070 x 2,157 mm**, ideal for large spaces such as conference rooms or home theaters.
