

Public bathroom soap dispenser with sensor h40_65

Automatic black chrome-plated brass dispenser with infrared sensor and wall mounting. 1.5L capacity, ideal for professional environments and offices.

The **h40_65 sensor soap dispenser** is an advanced technical solution designed to maximize hygiene standards and reduce physical contact in high-traffic environments. Made of **chrome-plated brass** with a durable **black** finish, the device is designed for **wall** mounting, ensuring a compact footprint and long operational life. **Infrared** sensing technology allows for immediate **touchless** dispensing, eliminating the need for manual contact and preventing cross-contamination.

Technical features

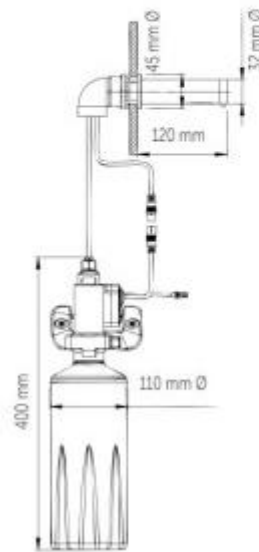

- **Technology:** Infrared sensor for automatic touchless activation
- **Material:** High-resistance chrome-plated brass
- **Finish:** Matte black
- **Installation:** Wall mounting (discreet fixing)
- **Tank capacity:** 1.5 liters
- **Dispensing dosage:** Adjustable between 0.5 ml and 2.0 ml per cycle
- **Soap compatibility:** Liquids with viscosity from 100 to 3,500 cP and neutral pH
- **Power supply:** Dual mode (mains power or batteries, not included)
