

Public space barrier with 2 posts h744_45

Decorative barrier h744_45 in galvanized steel and cast iron (100x108 cm). Ideal for historical centers thanks to the ornamental frieze and removable installation.

The **h744_45 barrier** is an urban furniture module designed to combine the physical delimitation of spaces with high-level ornamental aesthetics. Designed for contexts where architectural decor is a priority, this barrier solves the need for pedestrian safety in **squares, historical avenues, and institutional areas**, integrating harmoniously with the surrounding environment thanks to the classical references of the cast iron castings.

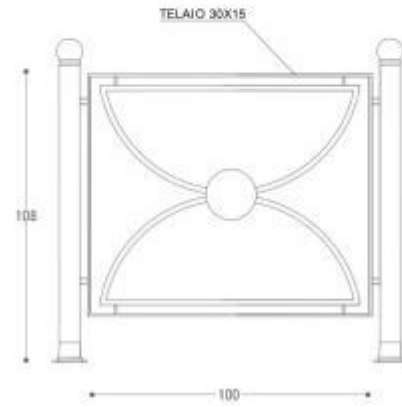

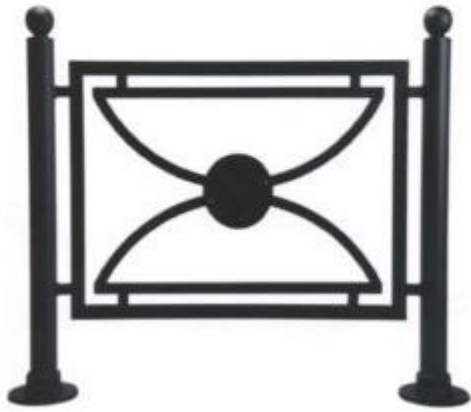

Technical characteristics

- **Vertical structure:** 2 steel posts with a diameter of 60 mm.
- **Ornamental elements:** Bases and terminal spheres in EN GJL 200 cast iron casting compliant with the UNI EN 1561 standard.
- **Central panel:** Hot-dip galvanized tubular frame (30x15 mm) with double square geometry.
- **Aesthetic details:** Opposed crescent inserts and circular central cast iron frieze.
- **Surface protection:** Hot-dip galvanization for superior resistance to oxidation.
- **Dimensions:** Width 100 cm, height above ground 108 cm.
- **Fixing system:** Base plates designed for expansion bolts on solid surfaces.
