

Public space bench with planter h140_520

Modern urban bench with integrated planter, ideal for squares, parks and pedestrian areas. Galvanized steel structure, okumè wood seat and integrated USB port. Dimensions: L 140 x D 140 x H 42 cm.

This **modern bench for public spaces H140_520** combines **modern design, functionality and sustainability**, offering a **comfortable seat** with an **integrated green element**. It is perfect for enhancing the urban furniture of **squares, parks and pedestrian areas**, adding a natural and harmonious touch.

The **structure** is made of **laser-cut galvanized sheet metal (2 mm thickness)**, with an **internal reinforcement frame** that guarantees **high stability and resistance to atmospheric agents**. The base is equipped with **adjustable feet**, allowing for optimal installation even on irregular surfaces.

The **seat** consists of **okumè wood slats (40x20 mm)**, fixed on shaped frames to ensure **comfort and durability over time**. The wood is treated to resist rain and sun, ensuring a long life without deteriorating.

The distinctive element of this bench is the **integrated planter**, made of **galvanized sheet metal (2 mm thickness)**. This module allows for **inserting plants and flowers**, contributing to the redevelopment of urban spaces and creating more welcoming environments.

For an even more functional experience, the bench includes a **USB port** positioned laterally and protected by a **closing cover**, ideal for recharging mobile devices in public spaces. The electrical system is housed in a **protected internal technical compartment**, ensuring safety and efficiency.

Thanks to **anti-corrosion treatments**, including **hot-dip galvanizing, sandblasting and powder coating**, the bench is designed to **resist corrosion and maintain its aesthetics over time**.

The urban furniture bench with planter H140_520 is a perfect complement to improve the livability of public spaces with a touch of design and innovation. Contact us now for a personalized quote!
