

Public space bike rack with steel eyelets h1023_08

2-seater rack with steel structure and anti-theft eyelets. Dimensions: W 70 x D 94.4 x H 85.6 cm.

The **H1023_08 bike rack** is a **self-supporting rack for public spaces**, designed to guarantee **maximum protection, stability and resistance**. Its robust structure, made of **steel with plastic-coated components**, makes it perfect for **company car parks, residential areas, public parking lots, stations, schools and retail outlets**.

The **2-seater configuration on one side** allows for a linear and tidy installation. The **slanted frame structure** provides **stable support**, preventing bicycles from leaning sideways and reducing the risk of **damage to the frame or wheels**.

The real strength of this model is the **presence of integrated steel eyelets**, which allow the bicycle to be **firmly secured with chains or padlocks**, offering **effective protection against theft**. The rack also meets the requirements of **DIN 79008:2016 part 72**, the reference standard for the safety of bicycle parking in public spaces.

The **plastic-coated wheel supports** ensure **high protection for the frame and rims**, while the **distance between the arcs of 575 mm** is also ideal for **tires up to 55 mm wide**. Thanks to the **positioning depth of 1830 mm**, the rack comfortably accommodates all types of bicycles.

Delivered in a prefabricated kit with a **bolted structure already ready for assembly**, it is also suitable for **serial installations** in high-traffic contexts.

Buy the **H1023_08 bike rack** now and guarantee safe, tidy and professional bicycle parking for public or corporate spaces.

Technical features:

- **Capacity:** 2 bicycles
- **Material:** Steel with plastic coating on the wheel supports
- **Color:** Silver
- **Anti-theft eyelets:** Yes, integrated into the structure
- **Structure:** Self-supporting with bolted assembly
- **Mounting:** Floor-mounted
- **Configuration:** One-sided
- **Distance between arcs:** 575 mm
- **Supported wheel width:** Up to 55 mm
- **Positioning area depth:** 1830 mm
- **Dimensions:** W 70 x D 94.4 x H 85.6 cm
- **Weight:** 14 kg
- **Regulation:** Compliant with DIN 79008:2016 part 72

User benefits:

FAQ:

1. **How many bicycles can it accommodate?**
Up to 2 bicycles, with a single-sided configuration.
2. **Is it suitable for outdoor use?**
Yes, the resistant steel structure is also designed for outdoor use.
3. **What type of wheels can it accommodate?**
Compatible with tires up to 55 mm wide.
4. **Does it require maintenance?**
No, the structure is self-supporting, resistant and durable, requiring only ordinary cleaning.
5. **Can I assemble it easily?**
Yes, the system is prefabricated and is quickly assembled by bolting.

Mini purchase guide:

If you are looking for a **resistant, modular and secure solution** for parking bicycles in public spaces, the **H1023_08** model is an excellent choice.

The **slanted and self-supporting structure** guarantees stability without the risk of damage to the bikes.

Thanks to the **integrated eyelets**, users can easily secure the bicycle to the frame, a key element against theft, especially in high-traffic environments.

It is also perfect for **serial installations**, for example in companies, stations, or at commercial premises, thanks to its **modularity** and **ease of assembly**.

In addition, **compliance with the DIN 79008:2016 standard** guarantees reliability and quality according to European standards.
