

Public space planter white travertine effect finish h319_150

Oval concrete planter with decorative band. Dimensions: L 100 x D 60 x H 65 cm.

The **H319_150 public space planter** is an urban furniture solution with a refined design and a robust structure, designed to enhance squares, sidewalks, public entrances, and green areas. With its **oval shape**, the **white travertine effect finish**, and the **decorative marble Greek key band**, it represents a perfect balance between classic aesthetics and contemporary functionality.

Made of **white concrete 52.5 R**, the planter offers high mechanical resistance and **superior durability** against the action of atmospheric agents. The **internal reinforcement** is made with **improved adhesion** elements, ensuring ideal structural hold even in the presence of damp soils or those subject to thermal fluctuations.

An important functional plus is the **provision for internal hooks** that facilitate **handling and positioning** operations, making the planter also suitable for large-scale urban furniture projects. The version with a **self-leveling base** is also available upon request, useful for installations on surfaces that are not perfectly flat.

With a weight of **300 kg**, the planter ensures **optimal stability** even in high pedestrian or vehicular traffic contexts, without the need for fixed anchors.

Buy the **H319_150 planter** now to bring elegance and robustness to your urban spaces. Contact us for customized supplies or bespoke solutions.

- **Ease:** of handling thanks to internal hooks.
- **Decoration:** in marble for superior aesthetic impact.
- **Possibility:** of installation even on irregular surfaces.

FAQ:

1. Is the planter weather-resistant?

Yes, the 52.5 R concrete guarantees high resistance to rain, frost, and sun.

2. Is it possible to move the planter?

Yes, it is equipped with internal hooks for handling with suitable equipment.

3. Can I place it on uneven ground?

Yes, the self-leveling version is available on request.

4. What kind of finish does it have?

It has a white travertine effect finish with a marble Greek key band.

5. Is it suitable for high-traffic environments?

Absolutely yes, thanks to its 300 kg weight and reinforced structure, it is perfect for high-traffic public spaces.

Mini buying guide:

Choosing a planter for urban furniture is not only aesthetic, but also functional.

The H319_150 combines **structural resistance**, **decorative finish**, and **ease of handling**, becoming an ideal solution for public bodies, municipal administrations, urban management companies, and architects.

If you need stability in unsupervised areas or areas exposed to traffic, its 300 kg weight makes it self-anchoring.

For irregular surfaces, it is also available in a **self-leveling** version, ensuring perfect positioning without soil preparation work.
