

## PVC hospitalization cage h601\_35

Animal hospitalization cage in non-toxic PVC, 4 places, removable divider, conductive wheels with brake. Dim. 121x72x152 cm.

The PVC animal hospitalization cage represents the solution dedicated to safe and protected housing during pre and post-operative recovery periods in the veterinary field. It allows for the appropriate isolation and containment of convalescing patients, ensuring protection and ease of clinical management.

The structure stands out for its constructive robustness and versatility of use. The **non-toxic PVC removable divider** allows for the configuration of the internal space according to needs: it is possible to use the lower part as a single housing or divide the space to accommodate multiple patients simultaneously. The **divider track** facilitates precise and smooth positioning.

Mobility is guaranteed by a system of **conductive wheels for electromagnetic staticity**, of which **two are equipped with brakes**, ensuring stability during hospitalization and ease of movement when necessary.

## Technical characteristics

- **Type:** Hospitalization cage
- **Capacity:** 4 places
- **Divider:** Removable in non-toxic PVC
- **Wheels:** Conductive for electromagnetic staticity, 2 with brake
- **Dimensions:** W. 121 × D. 72 × H. 152 cm
