

Quiet portable evaporative cooler h923_15

Quiet portable evaporative cooler h923_15 with 200 L tank. Air flow 30,000 m³/h, power 750 W, UV lamp and three speeds. Suitable for outdoor and large indoor spaces.

The **quiet portable evaporative cooler h923_15** is a high-efficiency portable device designed to cool the air by exploiting the natural evaporation of water. Developed for **industrial operators, employers, company safety managers, workshop technicians and managers of craft or commercial activities**, this system meets the need to air-condition large volumes in an ecological and economical way. The module solves the operational problem of **cooling and purifying the air in outdoor environments and in indoor spaces that cannot be delimited by doors, ensuring greater air recirculation and providing for the removal of fumes, odors and heat produced by running machines**. The operating principle involves water sliding through a panel and the hot air, passing through the water, gives up its heat and cools down. The unit includes a bactericidal UV lamp for water sanitization, a large 200-liter tank and easily removable and washable cellulose evaporative panels, housed in a UV and corrosion-resistant frame. Thanks to the plug and play system with Schuko connection, installation takes only a few minutes and the unit is immediately ready for use.

Technical features

- **Model/Type:** quiet portable evaporative cooler
- **Reference code:** h923_15
- **Volumetric air flow (Air Flow):** 30,000 m³/h
- **Water sanitization:** bactericidal UV lamp (Bactericidal UV Lamp - YES)
- **Nominal power supply (Power Supply):** 220 V / 50 Hz
- **Electrical connection type (Connection Type):** SCHUKO (Plug and play configuration)
- **Motor power (Engine Power):** 750 W
- **Ventilation adjustment:** 3 fan speeds
- **Water tank capacity (Tank Capacity):** 200 L
- **Automatic water supply (Direct Water Connection):** YES, for connection with hose and automatic filling
- **Internal water monitoring (Water Level Check):** YES
- **Structural overall dimensions (Dimensions):** 1600 x 780 x 1800 mm (L x W x H)
- **Net structural weight (Weight):** 135 Kg
- **User interface:** control panel
- **External frame features:** UV and corrosion resistant for greater durability and sustainability
- **Internal evaporative components:** cellulose panels, easily removable and washable
- **Air filtration system:** washable air filter
- **Pump safety devices:** automatic shutdown for lack of water to protect the lifting pump
- **Electrical reset systems:** automatic restart after a power failure
- **Energy efficiency:** high cooling capacity with very low energy and economic consumption
