

Rack for 12 scooters h729_36

Rack for 12 scooters with anti-theft clamp system and ground fixing via sealing. Dimensions: W 136 x D 23 x h 118 cm.

The **H729_36 scooter rack** is a professional solution for the safe and orderly parking of **up to 12 scooters**, designed for public spaces such as squares, schools, shopping centers, company parking lots, and urban areas. Thanks to the **face-to-face** arrangement, it optimizes the available space while maintaining order and functionality.

The integrated security system is based on an **adjustable clamp** that locks the stem of each scooter, providing stability and preventing accidental falls. The clamps are compatible with **cable or U-locks** (not included), ensuring reliable protection against theft. The rack is suitable for scooters with stems of a maximum diameter of **Ø 70 mm**, making it compatible with the most common models, including electric scooters.

Built with **Ø 50 mm steel tubes**, the rack is finished with an **anthracite black polyester powder coating** and an anti-rust treatment, ensuring exceptional resistance to atmospheric agents. Installation is carried out via **ground sealing**, using a dedicated 25 cm section of the tube to ensure maximum stability and durability over time.

With its robust and elegant design, the H729_36 rack integrates perfectly into public or private contexts, representing a safe and lasting choice for the parking of eco-friendly vehicles like scooters.

Ensure order and safety in your spaces with the **H729_36 scooter rack**, designed to accommodate up to 12 vehicles with a reliable anti-theft system and resistant materials. Ideal for urban spaces, schools, or companies, this rack is a long-lasting solution. **Buy now** to improve the organization of your parking lot or **contact us for a personalized quote** for multiple orders!

Technical characteristics:

- **Capacity:** Accommodates up to 12 scooters arranged face-to-face
- **Fixing system:** Ground sealing, with 25 cm of tube dedicated to fixing
- **Security system:** Clamp system to lock the scooter stem, compatible with cable or U-locks (not included)
- **Lock hole:** Ø 20 mm
- **Compatibility:** For scooters with stems of maximum diameter Ø 70 mm
- **Materials and finish:** Ø 50 mm steel tube with anthracite black polyester coating, anti-rust treatment
- **Clamp color:** light gray
- **Dimensions:** W 136 x D 23 x h 118 cm (including 25 cm for the part to be sealed)

User benefits:

- **Large capacity:** Allows for the parking of up to 12 scooters, ideal for busy public spaces.
- **Security:** Anti-theft system compatible with locks to protect vehicles.
- **Stability:** Clamp system that locks the stem, avoiding accidental falls.
- **Durability:** Materials treated against rust and atmospheric agents, perfect for outdoor use.
- **Space optimization:** Face-to-face arrangement for rational management of spaces.

FAQ:

1. How many scooters can it accommodate?

The H729_36 rack can accommodate up to 12 scooters arranged face-to-face.

2. **What types of scooters are compatible?**

It is compatible with scooters having a stem with a maximum diameter of Ø 70 mm, including most electric models.

3. **How is the rack secured to the ground?**

The rack is fixed by ground sealing, using a dedicated 25 cm section of the tube for optimal stability.

4. **Does the clamp system protect scooters from theft?**

Yes, the clamp system is designed to lock the stem and can be further secured with cable or U-locks.

5. **Is the rack weather-resistant?**

Absolutely. The steel structure with polyester powder coating and anti-rust treatment ensures resistance to rain, sun, and humidity.

6. **Is it difficult to install?**

Installation only requires ground sealing, which is simple to perform with standard equipment.

7. **Does it need maintenance?**

The rack requires minimal maintenance, with periodic cleaning to remove dust and dirt.

Mini buying guide:

When choosing a scooter rack, consider the **capacity** and frequency of use. For high-traffic areas, such as squares or company parking lots, the H729_36 is ideal thanks to its capacity to accommodate 12 scooters arranged face-to-face, optimizing space.

Security is another fundamental aspect. A clamp system, like that of the H729_36, offers stability and the possibility to add locks for anti-theft protection. **Weather resistance** is crucial for outdoor use: choose a model made of steel with protective coatings to ensure durability over time.

Finally, evaluate the **type of fixing**. Ground sealing, like that offered by the H729_36, ensures stability and makes the rack perfect even for high-traffic environments.
