

## Floor-standing bike rack with concrete supports h19109

Removable floor-standing bike rack with concrete supports and galvanized steel rack. Available with 2, 3, 4 and 5 spaces. Min. dim. 1040x450x340h mm.

The **floor-standing bike rack with concrete supports h19109** is a self-standing solution designed for functional urban furniture. Characterized by a removable structure that does not require anchoring to the ground, this model responds to the operational needs of **schools, public parks and city centers** that require ready-to-use and vandal-resistant bicycle parking systems. The combination of the two horizontal steel side members and the heavy side supports in concrete conglomerate guarantees **excellent stability**, solving the problem of accidental tipping or unauthorized displacement of the rack.

## Technical features

- **Rack material:** Galvanized and powder-coated steel
- **Metal finish:** Micaceous grey
- **Lateral supports:** High-resistance concrete conglomerate (R42.5) with internal steel reinforcement and marble chips
- **Available configurations:** 2, 3, 4 or 5 bike spaces
