Vertical bike rack h19141

Vertical bike rack in galvanized and powder-coated steel, to be buried in the ground. Available with 4, 5 and 6 spaces. Min. dimensions 1600x150x1060h mm.

The **vertical bike rack h19141** represents a professional and robust solution for organizing bicycle parking in high-density contexts. Designed to meet the needs of **public bodies, apartment buildings, schools and railway stations**, this rack solves the problem of disorder and instability of two-wheeled vehicles in areas subject to constant commuter flows. The structure is designed for **permanent anchoring through inground mounting**, ensuring superior stability and optimal resistance against removal attempts or accidental impacts.

Made with two **galvanized steel tube** posts and finished with elegant spherical aluminum knobs, the rack combines technical functionality with a refined design that integrates harmoniously into urban furniture. Protection by **powder coating in Micaceous Grey finish** ensures an effective barrier against corrosion and atmospheric agents, extending the life cycle of the product even in outdoor environments exposed to rain and humidity.

Technical features

- **Available configurations:** 4, 5 or 6 bike space models.
- **Dimensions (L x D x H):** mm 1600/2000/2400 x 150 x 1060.
- **Structure material:** galvanized and powder-coated steel.
- **Surface finish:** Micaceous Grey.
- **Load-bearing posts diameter:** mm 76.
- **Horizontal tubular dimensions:** mm 250 x 250.
- **Fixing system:** to be buried directly in the ground (inground mounting).
- **Height of the part to be buried:** mm 25 x 25 x 2.
- **Supply status:** product delivered already assembled.
