Double-sided bike rack for inground mounting h19143

Double-sided vertical bike rack in galvanized steel for inground mounting, min. dimensions 1600x150x1210 mm. Available with 7, 9 and 10 spaces.

The **h19143 double-sided vertical bike rack** is a solution designed for urban furniture and the management of residential areas that need to optimize parking volumes. Thanks to the alternating arrangement of the wheel-holder brackets on both sides, the product allows for a high number of bicycles while reducing surface space. Designed to withstand high-traffic outdoor contexts, it solves the problem of disorder in public and private bicycle parking lots through a **galvanized and painted steel structure**, specifically for permanent installations via inground mounting. The target audience includes municipal administrations, green area designers, and residential complex managers looking for a robust and long-lasting support.

Technical specifications

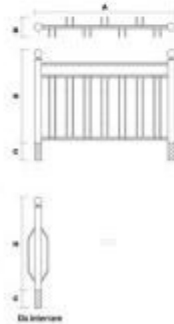

- **Structure:** Galvanized and powder-coated steel for outdoor use.
- **Finish:** Micaceous Grey color.
- **Available configurations:** 7, 9 or 11 bike spaces.
- **Dimensions (L x W x H):** 1600/2000/2400 x 150 x 1210 mm (length varies based on the number of spaces).
- **Side post diameter:** 76 mm with spherical decorative element (diameter 89 mm).
- **Horizontal tubular section:** 25 x 25 mm.
- **Fixing system:** To be buried directly into the ground (inground depth 25 x 25 x 2 mm).
- **Supply condition:** Product delivered already assembled, ready for installation.
