Steel Bike Rack h19105

Floor-standing bike rack in galvanized and micaceous grey painted steel. Available in 2, 3, 4 and 5-space versions. Min. dim. 800x440x310h mm.

The **h19105 floor-standing bike rack** represents a professional and robust solution for the organization of bicycle parking in public and private contexts. Designed to solve the problem of disorder and the safety of bicycles near **urban centers, parks, schools, and apartment complexes**, this structure offers stable and long-lasting support. The product is aimed at municipal administrations, managers of accommodation facilities, and design studios that require a functional and weather-resistant parking system.

The structure is composed of two horizontal side members in steel tube on which triangular-shaped wheel holder elements are welded, ensuring optimal grip of the vehicle. Thanks to **cold galvanizing** and subsequent **powder coating in micaceous grey color**, the bike rack maintains its aesthetic and structural integrity against corrosion and wear over time. Fixing is carried out using anchor bolts on laser-cut shaped sheet metal plates, ensuring maximum stability to the ground.

Technical features

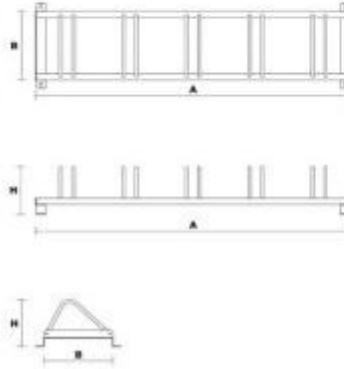

- **Material:** Cold-galvanized and powder-coated steel
- **Finish:** Micaceous grey
- **Available configurations:** 2, 3, 4 or 5 spaces
- **Depth and height dimensions:** 440 x 310 mm
- **Total length:** 800 mm (2 spaces), 1200 mm (3 spaces), 1600 mm (4 spaces), 2000 mm (5 spaces)
- **Horizontal pipe diameter:** 42 x 3 mm
- **Wheel-holder bracket diameter:** 20 x 1.5 mm
- **Bracket dimensions:** 420 x 200 mm (W x h)
- **Operating weight:** 9, 13, 17, 21 kg based on the variant
- **Installation:** Prepared for ground anchoring via anchor bolts
- **Supply condition:** Fully assembled
