

Bicycle rack with concrete supports h19102

Double-sided bike rack with reinforced concrete supports and galvanized steel structure. Available in 4, 6, 8, and 10 spaces. Minimum dimensions 1040x450x340 mm.

The **h19102 bicycle rack** is a removable double-sided parking system, designed for urban contexts and private areas where mechanical anchoring to the ground is not possible or desirable. Thanks to the heavy **lateral supports in cement conglomerate**, the structure guarantees natural stability through gravity, solving the problem of positioning on prestigious flooring or surfaces that cannot be drilled.

Designed to optimize parking volumes, the double-sided configuration allows access from both sides, doubling the parking capacity in confined spaces. The target audience includes municipal administrations, shopping centers, condominiums, and accommodation facilities that require a **self-supporting and resistant** solution to atmospheric agents and vandalism.

Technical features

- **Available configurations:** version with 4, 6, 8, or 10 bike spaces.
- **Dimensions (L x W x H):** from 1040 mm (4 spaces) - 1440 (6 spaces) - 1840 (8 spaces) - 2240 mm (10 spaces) x 450 x 340 mm.
- **Load-bearing structure:** horizontal tubes in galvanized steel.
- **Surface treatment:** powder coating for high corrosion resistance.
- **Side elements:** high-resistance cement conglomerate with internal steel reinforcement.
- **Aggregate finish:** mixture with 120 mm thick marble grit.
- **Fixings:** stainless steel screws for mounting the rack to the supports.
- **Production:** Made in Italy.

Available options for the support finish:

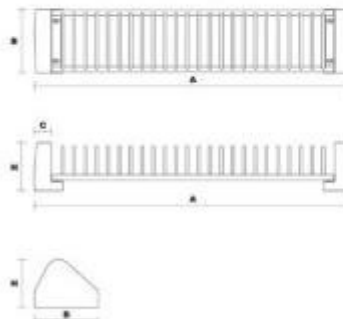

- Carrara White
- Verona Red
- Occhialino
