Rack bike stand with concrete supports h19114

Double-sided rack bike stand with concrete side supports and galvanized steel structure. Available with 4, 6, 8, 10 spaces and in different finishes.

The **h19114 rack bike stand** is a self-supporting solution designed for the setting up of cycle parking areas in urban and commercial contexts. Characterized by a **double-sided** structure, the device optimizes operational space by allowing access and parking for bicycles from both sides. The combination of **painted galvanized steel** and **concrete conglomerate** supports guarantees high mechanical resistance and stability, effectively responding to the needs of public bodies and managers of collective spaces facing the problem of untidy parking and vulnerability to atmospheric agents.

Technical features

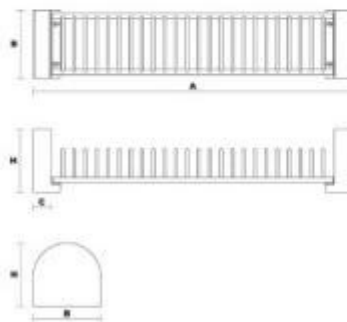

- **Available configurations:** 4, 6, 8 or 10 bike spaces
- **Dimensions (W x D x H):** 1060 - 1460 - 1860 - 2260 x 480 x 450 mm
- **Rack material:** Powder-coated galvanized steel
- **Side supports:** High-resistance concrete conglomerate (R42.5) with internal steel reinforcement
- **Support finish:** Marble grit (available in Carrara White, Occhialino or Verona Red)
- **Useful wheel space:** 60 mm (distance between supports)
- **Total weight:** 125, 136, 146 and 150 Kg based on modularity
- **Supply condition:** Fully assembled
