

Recessed manhole cover class D400 h638_93

Recessed manhole cover for lids. Class D400. Dimensions 500x500 mm

Recessed manhole cover, in **ductile iron** produced by an **ISO 9001:2015 certified** company, according to the latest edition of the UNI EN 124 standard, load class D400, consisting of a frame, without an external perimeter flange, square in shape both at the support base and at the top corresponding to the road surface level. **Square-shaped lid** equipped with a **filling tray** with a minimum internal height of 84 mm for class D400; **blind-bottom slots** suitable for accommodating lifting keys. **Place of use: Concrete, paved and porphyry flooring.** Complementary works: the use of concrete and/or other filling materials must take place following the product manufacturer's instructions (dosage, water/cement ratio, installation, curing times). Respect the minimum curing time before stressing the manhole cover with operating loads.

Technical features:

- Material: ductile iron
- Recessed manhole cover
- External dimensions: 500x500 mm
- Clear opening: 405x405 mm
- Height: 100 mm
- Weight: approx. 45 kg
- Internal depth: 84 mm
- Frame shape: square
- Lid shape: square
- Load class: D400
