

Recessed manhole cover in spheroidal graphite cast iron h638_21

Recessed road manhole cover. Material: spheroidal graphite cast iron. Dimensions: 76 x 132 cm. Internal depth: 80 mm.

Recessed road manhole cover designed for use on concrete, paved and porphyry floors. Surface to be covered with the same material as the surrounding flooring; this makes it perfectly adaptable to any context. Made of **spheroidal graphite cast iron** and consisting of a **rectangular frame** equipped with an external perimeter flange and **2 square covers** with filling tray and closed-bottom slots for inserting lifting keys. Customizable thanks to the presence of a space on the cover where logos or inscriptions can be inserted.

Technical features:

- Dimensions: 76 x 132 cm
- Clear opening: 60 x 120 cm
- Height: 10 cm
- Internal depth: 80 mm
- Weight: 155 kg
- Breaking load: >400 Kn
- Material: spheroidal graphite cast iron
- Frame shape: rectangular
- Cover shape: 2 square covers
- Product compliant with UNI EN 1563 standard, load class D400
- Compliant with S.T. TELECOM ITALIA n.1479/2015
