

Recessed road manhole cover 60x60 cm h638_94

Recessed manhole cover in ductile iron. Class: D400. Dimensions: 600x600 mm.

Recessed manhole cover, square shape dimensions 600x600 mm, in ductile iron produced by an **ISO 9001:2015 certified company**, according to the provisions of the latest edition of the **UNI EN 124 standard**, load class D400, consisting of a frame, without external perimeter flange, square-shaped both at the supporting base and at the top corresponding to the road surface level. **Square-shaped cover** equipped with a filling tray with a **minimum internal height of 84 mm for class D400**; closed-bottom slots suitable for receiving lifting keys. **Place of use: Concrete, paved and porphyry floors.** Complementary works: the use of concrete and/or other filling materials must take place following the manufacturer's instructions (dosage, water/cement ratio, installation, curing times). Respect the minimum curing time before stressing the manhole cover with operating loads.

Technical specifications:

- Material: ductile iron
- External dimensions: 600x600 mm
- Clear opening: 505x505 mm
- Height: 90 mm
- Weight: approx. 45 kg
- Internal depth: 84 mm
- Frame shape: square
- Cover shape: square
- Load class: D400
