

Recovery cage with oxygen door h601_39

Veterinary recovery cage in PVC, capacity 4 animals, removable dividers, oxygen therapy door, dimensions W121 x D72 x H190 cm.

The PVC animal recovery cage represents a functional and indispensable piece of furniture for veterinary clinics and practices. It allows for housing up to **4 pets** awaiting care and surgical operations, guaranteeing patients who have already undergone surgery rest and effective treatments in a controlled and hygienic environment.

The product is equipped with **removable non-toxic PVC dividers** that allow configuring the spaces according to needs: the lower part can be used as a single housing or divided to accommodate multiple patients simultaneously. It is also equipped with an **oxygen therapy door**, a critical element for respiratory support during post-operative recovery.

The structure features **constructive stability and robustness** made with **high-quality materials** that ensure the maintenance of high hygiene standards, a fundamental requirement in veterinary clinical environments.
