

Rectangular planter for street furniture h287_390

Planter for street furniture in galvanized steel with double fiberglass container. Dimensions: W 130 x D 65 x H 70 cm.

The **H287_390 rectangular planter** is an **elegant and functional street furniture** element, designed to enhance and decorate **outdoor public spaces** such as squares, avenues, parks, pedestrian areas, public entrances, and green areas. The structure is made of **robust, corrosion-resistant** materials and finished with **non-toxic powder coating** that ensures durability over time even in environments subject to bad weather.

Consisting of **4 vertical posts in Ø 60 mm galvanized steel round tube**, it is enriched at the top by a **hot-forged spherical decoration**, a distinctive design element. The perimeter frame is made of **galvanized tubular steel** with a central crossbar decorated with a **pressed steel flower**, which adds a refined aesthetic touch. The base is reinforced with **hot-forged steel bases**, designed to guarantee **stability and solidity**.

The **internal container is double**, made of **anthracite gray fiberglass**, a lightweight but resistant material, easily washable and waterproof. Upon request, with a surcharge, it is also available in **galvanized steel sheet**, for those who desire complete uniformity with the load-bearing structure.

The painting treatment includes: steam degreasing, electrostatic powder coating, oven baking at 180-200°C, and natural cooling. This process guarantees a **resistant, uniform, and non-toxic finish**, compliant with current regulations.

The **ground-level anchoring** allows for a discreet and stable integration into the urban context, without protruding or invasive elements.

Customize your **H287_390 urban planter** with the desired RAL color! Request a custom quote for public or private supplies.

Technical features:

- **Structure:** 4 galvanized steel posts Ø 60 mm
- **Decorative element:** spherical in forged iron

- **Aesthetics:** decorative with high-quality handcrafted finishes.
- **Very high:** resistance to atmospheric agents thanks to galvanization and painting.
- **Container:** internal, washable and replaceable.
- **Possibility:** of customization.
- **Perfect:** urban integration thanks to the discreet ground-level anchoring.

FAQ:

1. What are its dimensions?

Its dimensions are W 130 x D 65 x H 70 cm.

2. Is the internal container removable?

Yes, and it is available both in fiberglass and, with a surcharge, in galvanized steel upon request.

3. Is special anchoring required for installation?

No, the planter is anchored flush with the ground and designed for stable positioning without external obstacles.

4. Is it suitable for public spaces exposed to the elements?

Absolutely yes. The galvanized and painted structure is ideal for continuous outdoor use.

5. What maintenance is required?

Minimal maintenance: just periodic cleaning with water and neutral detergents. The material is resistant to rust and impacts.

Mini buying guide:

When choosing a planter for public spaces, it is important to consider **durability, aesthetics, and ease of maintenance.**

Galvanized steel planters like the H287_390 model guarantee **resistance over time**, even in difficult climatic conditions.

The double internal container allows for easier plant management.

The **possibility of color customization** makes them suitable for any urban, architectural, or landscape context.

Perfect for **municipalities, public bodies, shopping centers, accommodation facilities, and private residences.**
