

Rectangular table for nursery school h681_35

Rectangular table 130x65 cm for nurseries in FSC beech and magnolia HPL. Ergonomic, fireproof and safe for the 0-3 years age group.

The **h681_35 rectangular table** is a technical furnishing solution specifically developed for the ergonomic and safety needs of **nurseries** and **nursery schools**. Designed to accommodate children in the **0-3 years** age group, the rectangular module allows for optimal management of educational spaces, favoring both island positioning and placement against the wall or with other modules for collective activities.

The structure is distinguished by the absence of under-top frames, a design choice that maximizes legroom for small users and prevents accidental bumps. The patented anchoring system uses an **anti-tear plate** with a threaded pin on a recessed bush, guaranteeing superior structural solidity even in contexts of intensive and prolonged use.

Technical features

- **Dimensions:** W 130 x D 65 x h 42 cm
- **Leg material:** FSC certified solid beech wood, diameter 60 mm
- **Structure finish:** Natural varnishing with non-toxic water-soluble products
- **Worktop:** Class E1 birch plywood (low emissions), thickness 21 mm
- **Coating:** High-resistance HPL plastic laminate (9/10 mm) on both sides
- **Surface properties:** Scratch-resistant, matte and fireproof in Class 1 fire reaction
- **Safety:** Full-radius rounded edges and naturally polished
- **Accessories:** Adjustable noise-reducing glides made of robust thermoplastic material
- **Top color:** Magnolia
