

Rectangular urban furniture bollard h1003_24

Rectangular bollard in galvanized and painted steel, H 120 cm. Equipped with a top hole for chains, ideal for delimiting access and parking areas.

The **rectangular bollard H1003_24** represents an advanced technical solution for the management and protection of traffic flows in public and private contexts. Designed with a rectangular section metal profile, this urban furniture element combines essential aesthetics with high **structural resistance**. The structure is made of **hot-dip galvanized steel** and finished with thermosetting polyester powder coating, a treatment that ensures total protection against oxidation and aggressive atmospheric agents.

The peculiarity of this model is the **top pass-through hole**, a functional feature that allows the integration of chains or ropes, transforming individual bollards into a continuous and modular barrier. The fixing system via **anchoring to be embedded in concrete** guarantees maximum stability and permanence of the installation, making it suitable for high-traffic areas or zones requiring an impassable delimitation.

Technical features

- **Material:** hot-dip galvanized steel with thermosetting polyester powder finish
- **Section dimensions:** W 10 x D 5.5 cm
- **Height above ground:** 120 cm
- **Total weight:** 8 kg
- **Configuration:** rectangular section with top provision for chains
- **Installation system:** fixed mounting to be cemented directly into the ground
- **Finishes:** colors available on request according to RAL chart
- **Intended use:** outdoor environments, parking lots, corporate entrances, pedestrian areas
