

Recycling station capacity 4 x 45 L h719_22

4-compartment container for indoor use. Elegant and modern design. Capacity: 4 x 45 L.

Recycling station ideal for placement in **indoor spaces**. Created in **high-quality galvanized steel sheet with powder coating**. Composed of **n.4 inner containers** in galvanized steel with a **capacity of 45 L each** and relative **stainless steel swing lids** with a grained structure, which allow for the separation and easy insertion of waste. The convenient **front hinged doors** are easy to open thanks to the **ergonomic semi-circular handles** in stainless steel and the **square lock with key included**. In this way, the inner containers can be quickly emptied: simply open the doors and remove each container, lifting the relative waste bag contained inside. The structure is made of **galvanized steel sheet** and features **adjustable front feet** at the base that guarantee **stability** even **on irregular floors**.

Technical features:

- Dimensions: h 975 x w 1100 x d 320 mm
- Material: high-quality powder-coated galvanized steel sheet
- Capacity: 4 x 45 L
- Color: soft mocha
- No. of compartments: 4
- No. of inner containers: 4
- Swing lids
- Front hinged doors with key lock and key included
- No.2 adjustable front feet
- Fireproof, scratch-resistant and impact-resistant product
- DIN 4102, fire protection class A1
- Warranty: 5 years
- TÜV certified product

INFORMATION

- **Height in millimeters** 975.000000
- **Capacity** 4 x 45 lt
- **Width in millimeters** 1100.000000
- **Material** galvanized steel
- **Depth in millimeters** 320.000000
