

Recycling station for indoor spaces h424_94

Self-extinguishing recycling bin for indoor use. Capacity: 100 lt. Dimensions: W.59.8 x D.39 x h.81.5.

Recycling bin, specifically for use in indoor public spaces such as airports and stations. Made of **cold-rolled steel** and equipped with **self-extinguishing certification**. Composed of **2 compartments**, each equipped with an **internal metal bucket with a bag-retaining elastic**. The lid is protected by a **key lock** and features 2 open insertion slots with labels that identify the type of waste to be disposed of. The structure incorporates **handles to facilitate gripping** during installation and movement operations. The base is equipped with **adjustable feet** and is designed to be bolted to the ground (anchor bolts not included).

Technical features:

- Dimensions: W.59.8 x D.39 x h.81.5
- Material: steel
- Capacity: 100 lt (2 compartments of 50 lt each)
- 2 independent internal compartments with elastic for bag attachment
- Easy emptying
- Base with adjustable plastic feet
- Fixing: to be bolted (anchor bolts not included)
- Lid with lock
