

Red dog waste collection container h326_59

50L polyethylene dog waste collection container, 30x45 cm base, ABS lid with lock, H.75 cm galvanized post.

The dog waste collection container is a piece of equipment dedicated to the **maintenance of hygiene in public spaces** where dogs are walked, such as parks, municipal gardens, and urban areas. Designed to offer a hygienic and practical solution, it allows pet owners to deposit waste in an orderly and contained manner, reducing visual pollution and the degradation of shared spaces.

The structure of the container combines **high-density polyethylene** for the main body, characterized by **high resistance to impacts and aging**, ensuring durability even in critical climatic conditions. The **ABS lid** is equipped with a **triangle lock** that allows opening only by authorized operators for emptying. Access to the waste is controlled via a **white methacrylate ABS anti-intrusion accessory**, which limits the opening to a small size (18.5 x 16 cm), preventing accidental extraction of waste or access by animals.

The container is mounted on a **75 cm high galvanized post**, suitable for insertion into sand or soil, ensuring stability and correct positioning.

Technical specifications

- Body material: **high-density polyethylene**
- Lid and accessories material: **ABS**
- Capacity: **50 liters**
- Color: **red**
- Container height: **60 cm**
- Upper base dimensions: **30 x 45 cm**
- Waste introduction opening: **18.5 x 16 cm**
- Support post: **galvanized, height 75 cm**
- Closing: **triangle lock**
- Anti-intrusion accessory: **in white methacrylate ABS**
