

Red first aid backpack h690_26

Compact first aid backpack in 1000D polyester (33x8x51 cm). MOLLE modular system and quick anchoring for interventions in confined spaces.

The **H690_26 first aid backpack** is a technical support specifically designed for healthcare professionals operating in environments with reduced mobility or confined spaces. Its **lightweight and fully padded structure** is designed to offer an optimal balance between protection of the contents and ease of transport, ensuring immediate access to medical devices during emergencies.

Made of high-tenacity **1000D polyester**, the backpack ensures long operational life even in intensive use contexts. Modularity is at the heart of the design: thanks to the **front and side MOLLE system**, the operator can integrate additional pockets, while the special buckle system allows **anchoring between multiple units**, transforming compact backpacks into a single storage system with greater capacity.

Technical features

- **Material:** 1000D polyester, abrasion-resistant and lightweight
- **Dimensions:** W 33 x D 8 x H 51 cm
