

Reflective road marker h972_158

Reflective road marker in yellow polypropylene. High-visibility reflector for area delineation, 20 t capacity. Dimensions: W 10 x D 10 x H 2 cm.

The **reflective road marker h972_158** is a passive signaling device designed to increase safety and visibility in urban, school, and industrial contexts. Made of **high-resistance polypropylene** in yellow, the product acts as a physical and visual delineator for sidewalks, pedestrian areas, and parking zones. Thanks to its robust structure, the reflector is able to withstand the passage of vehicles with a mass of up to **20 tons**, solving the problem of frequent breakage of markers in high-traffic areas. Installation is made immediate by the integrated **adhesive back**, which allows for perfect adhesion to road surfaces without the aid of complex mechanical fixings.

Technical specifications

- **Material:** High-density polypropylene
- **Color:** High-visibility yellow
- **Dimensions:** 100 x 100 mm
- **Height:** 20 mm
- **Net weight:** 0.12 kg
- **Load resistance:** Suitable for vehicles up to 20 tons
- **Fixing system:** Adhesive bottom surface
- **Optical properties:** Integrated reflective insert
