

Refrigerated display case with cooling pack h712_47

Refrigerated buffet display with cooling pack and GN 1/1 tray. Height: 7 cm.

The **h712_47 refrigerated display case** is an essential and functional counter-top display, designed to maintain the freshness of cold dishes in hotels, restaurants, and breakfast rooms. Thanks to its extremely low profile (only 7 cm high), it ensures a discreet and tidy presentation on the buffet counter. The refrigeration system uses a **cooling pack (refrigerant element)** positioned at the base, which acts directly on the **GN 1/1 tray** provided. Made of **nickel-plated chrome steel** and polycarbonate, the structure is designed to offer maximum hygiene and long-lasting durability, resisting intensive daily use.
