

Refrigerated display for hotel buffet h110_185

Refrigerated display for buffet. With 1 eutectic plate. Dimensions: W 203 x D 203 x H 77 mm.

The **h110_185 refrigerated display for hotel buffets** is a compact and versatile professional solution, designed to maintain the freshness of single courses or small containers in catering and restaurant settings. The square structure is made of robust **black epoxy powder-coated steel**, ensuring long life and optimal resistance to humidity. The passive cooling system uses a high-efficiency **aluminum eutectic plate**, capable of maintaining the temperature for up to 6 hours. Thanks to its minimal design and rubber feet, it integrates perfectly into any buffet setup, ensuring stability and protection of surfaces.

Technical features
