

Refrigerated food display h24280

Buffet refrigerated display case with GN 1/1 stainless steel tray. Dimensions: H.30 x D.34 x L.54 cm.

The **h24280 refrigerated food display** is a professional display case designed for the exhibition and preservation of fresh food in high-traffic environments such as hotels, canteens, and catering services. The structure is entirely made of **stainless steel**, guaranteeing robustness and maximum food hygiene. The passive refrigeration system uses **four ice elements** positioned under the GN 1/1 tray, allowing the cold chain to be maintained without the need for an electrical power supply. Food protection is provided by an elegant **polycarbonate roll-top lid**, which ensures perfect visibility and quick access to the dishes.

Technical features

- **Structure material:** high-quality stainless steel.
- **Cover:** transparent and resistant polycarbonate roll-top lid.
- **Tray:** Gastronorm GN 1/1 format with 20 mm depth.
- **Cooling system:** 4 ice elements (thermal accumulators) included.
- **Total dimensions:** L. 54 x D. 34 x H. 30 cm.
- **Type:** passive refrigeration for buffets and catering.
