

Rehabilitation cycle ergometer h731_91

Vertical cycle ergometer for advanced rehabilitation, equipped with a 7" color touch screen display, adjustable resistance from 15 to 500 W and wide easy access. Ideal for medical and physiotherapeutic use. Dimensions: L 119 x W 65 x H 145 cm.

The **H731_91 cycle ergometer** is a state-of-the-art instrument designed to ensure maximum comfort and precision during **rehabilitation activities and controlled training**. It has been developed with particular attention to **biomechanical aspects**, offering a safe and effective user experience.

The **control console** is equipped with a **7" color touch screen display**, which allows for **intuitive navigation** and **advanced visualization of training parameters**. Available programs include **Quick Start, Watt** and **Pulse**, with settings in **10 different languages**.

The cycle ergometer is independent of the power grid and offers **adjustable resistance from 15 to 500 watts** and a speed of **15-140 rpm**, adapting perfectly to the needs of each user. The **height and depth adjustable saddle** allows the device to be used comfortably even for users with heights between **135 and 205 cm**.

The **tilt-adjustable handlebar** and the **wide easy access (34-41 cm)** ensure easy mounting and dismounting, making this cycle ergometer ideal even for patients with reduced mobility. The **single belt drive system** ensures smooth and silent pedaling.

Compliant with **DIN EN ISO 20957-1/5 S-A-I, DIN EN 60601-1** and **93/42/EEC** standards, it is synonymous with quality, reliability and safety.

Don't miss the opportunity to improve your rehabilitation experience with the **professional H731_91 cycle ergometer!** Order now or contact us for further information.

Technical features:

- **Resistance:** 15 ÷ 500 W, 15 ÷ 140 rpm
- **Drive system:** Single belt
- **Display:** 7" color touch screen
- **Programs:** Quick Start, Watt, Pulse
- **Pulse measurement:** Hybrid integrated receiver 5kHz/Bluetooth
- **Access:** Easy access (34 ÷ 41 cm)
- **Saddle adjustment:** Height and depth (for users from 135 ÷ 205 cm)
- **Transport wheels:** Yes
- **Dimensions:** L 119 x W 65 x H 145 cm
- **Weight:** 58 kg
- **Maximum capacity:** 150 kg

- **Certification:** DIN EN ISO 20957-1/5 S-A-I, DIN EN 60601-1 and 93/42/EEC

User benefits:

- **Designed:** for advanced rehabilitation and physiotherapy.
- **Easy access:** ideal for users with reduced mobility.
- **Color touch screen console:** for intuitive and immediate navigation.
- **Adjustable resistance:** from 15 to 500 watts for personalized exercises.
- **Smooth and silent pedaling:** thanks to the single belt drive.
- **Adaptable to different body types:** thanks to the saddle adjustment.

FAQ:

1. **How many languages can be set in the bike's console?**
In the bike's console, 10 foreign languages can be set.
2. **What is the maximum weight supported?**
The maximum capacity is 150 kg.
3. **Is it necessary to connect it to the power grid?**
No, the cycle ergometer works completely independently of the power grid.
4. **Which programs are available?**
There are 3 programs available: Quick Start, Watt and Pulse.
5. **What is the maximum supported user height?**
The saddle is adjustable for users with a height between 135 and 205 cm.

Mini buying guide:

The **H731_91 cycle ergometer** is a perfect solution for **advanced rehabilitation and targeted training** in medical and physiotherapeutic settings. Thanks to the **adjustable resistance** and **advanced visualization of training parameters**, it allows you to customize every exercise to meet specific needs.

The **easy access** and **intuitive navigation via the touch screen display** make this device simple to use even for less experienced users. If you are looking for a reliable and technologically advanced cycle ergometer, **H731_91** is the ideal choice.

Rehabilitation cycle ergometer, H731_91, professional ergometer, cycle ergometer with touch display, advanced rehabilitation, medical cycle ergometer.
