

Rehabilitation parallel bars h731_17

Rehabilitation parallel bars, 2.5 m long, in painted steel.

Parallel bars for **physical-rehabilitation** exercise, ideal for medical offices, consisting of a painted steel structure with non-slip thermoplastic handrails. All parts are easily washable. The structure is **foldable** and therefore suitable for use in limited spaces, as well as allowing for adjustment of the mutual distance between the handrails. The parallel bars are height-adjustable with a telescopic system. Locking is ensured by an exclusive double-action handwheel.

Technical Features:

- Handrail height adjustment system: telescopic
- Handrail height min-max: 80- 110 cm
- Load capacity on single handrail: 135 kg
- Dimensions: L. 247 x D. 90 x H. 110 cm
- Weight: 43 kg
- Certifications: CE marking

INFORMATION

- **Length in millimeters** 2500.000000
