

Reinforced service trolley h09_266

Service trolley in AISI 304 stainless steel with 3 soundproofed shelves. Dimensions 110x60 cm, load capacity 150 kg, ideal for heavy loads and hygiene.

The **h09_266** service trolley is a professional solution designed for intensive transport in contexts requiring maximum hygiene and structural robustness. Made entirely of **AISI 304 stainless steel**, this trolley is built to withstand constant mechanical stress and exposure to aggressive cleaning agents, typical of the healthcare and collective catering sectors.

The configuration with three high-thickness shelves integrates a **soundproofing** system that significantly reduces vibrations and noise pollution during handling. The circular section tubular structure ensures an ergonomic grip and superior stability, allowing for the management of loads up to 150 kg in total safety.

Technical specifications

- **Material:** AISI 304 stainless steel with satin finish
- **Structure:** Round tubular with 25 mm diameter
- **Configuration:** 3 shelves pressed in tray shape with rounded edges
- **Treatment:** Soundproofed shelves for impact noise reduction
- **Shelf dimensions:** 100 x 50 cm
- **Handling:** 4 multi-directional wheels with 125 mm diameter
- **Protections:** Non-marking rubber corner bumpers
- **Overall capacity:** Approximately 150 kg
- **Total dimensions:** 110 x 60 x 100(h) cm
