

Reinforced service trolley h117113

Reinforced 18/10 stainless steel service trolley with 2 soundproofed shelves, welded structure and 260 kg load capacity for intensive professional use.

The reinforced service trolley **h117113** is a high-performance logistics solution, designed specifically for intensive handling within professional kitchens, canteens and food laboratories. The **fully welded structure** in 18/10 stainless steel eliminates the vibrations and failures typical of models assembled with bolts, ensuring superior structural stability over time.

The two shelves, equipped with perfectly rounded surfaces to facilitate sanitization, integrate a **soundproofing** system that drastically reduces noise pollution during transport, a critical factor in environments such as restaurant dining rooms and hotel corridors. Movement is handled by four non-marking rubber swivel wheels, designed not to damage delicate flooring.

Technical features

- **Material:** High-quality 18/10 stainless steel
- **Configuration:** 2 shelves with rounded and soundproofed edges
- **Load capacity:** 130 kg per single shelf (total 260 kg)
- **Movement system:** 4 swivel rubber wheels Ø 125 mm, 2 of which are equipped with brakes
- **Protection:** 4 rubber corner bumpers
- **Useful shelf dimensions:** 1000 x 600 mm
- **Total dimensions:** 1100 x 690 x h. 900 mm
